

## INSULATOR TESTERS

### ABOVE GROUND

### RF-IT

Radio Frequency instrument allows testing on structures under protection. Audible beep gets faster the closer to the point of contact. Use needle tipped probes to move bolt to bolt to find contact.

- Digital Meter
- Battery Operated
- Audible Beep
- Use on structure regardless of CP

**AVAILABLE FROM STOCK!**

### CE-IT

Capacitance Effect instrument allows for testing of buried insulators on structures with or without cathodic protection or other voltages or currents.

Push button test lasts about 30 sec's and shows OPEN, SHORT or GOOD on digital readout

### BELOW GROUND

# TINKER & RASOR

CORROSION MITIGATION INSTRUMENTATION

## PRODUCT DATA SHEET

### MODEL RF-IT MODEL CE-IT

#### RF-IT Features:

- Move bolt to bolt to find contact
- Use on structures with or without CP
- Uses Radio Frequency to test effectiveness of above ground insulators
- Auto Shut-Off feature

#### CE-IT Features:

- Fully automatic push button test
- Shows GOOD, SHORT or OPEN condition
- Use on buried insulators via test station
- Auto Shut-Off feature

#### Construction:

Housed in tough polypropylene case with handle.  
RF-IT comes with (2) sets of needle points

#### Applications:

- Above Ground insulators
- Below Ground insulators
- Use regardless of CP or other current / voltage present on structure.

#### Specifications:

Battery Operated  
(6) Alkaline "AA" batteries (replaceable)  
Cables and Probes included

#### Dimensions:

8" length x 4" width x 3" depth  
Operating Weight: 2 lbs.  
Shipping Weight: 3 lbs.

DELIVERY: **Immediately from STOCK**  
EX-Works San Bernardino, CA USA  
SERVICE: **24-hour Turn-Around**  
TERMS: Net 30 Days, on approval of credit  
WARRANTY: **90 Days**, parts and labor
